## Report

English literary Association conducted **Vocabulary Building** event during 07 Nov. to 22 Nov. 2022. Fifteen students participated and willingly involved. They were asked to select news item in English newspaper. Students were informed to find out the difficult words with their meanings in English. It helped the students to use the words in different context. It also helped to enrich their vocabulary. Due to this, they became able to organize and structure their thoughts in speech and writing. They got habituated to find out the meanings of difficult words. They also became habituated to learn words independently. This innovative activity was appreciated by the college Principal, Dr. Ajay Patil.

spraying hot water typically between 45 & 75°C (110° and 170°F) on the dishes, with lower temperatures used for delicate items. A mixture of water & dishwasher detergent is pumped to one or more rotating spray arms, which blast the dishes with the cleaning mixture. Once the wash is finished, the water is drained, more hot water is pumped in & a rinse cycle begins. Sanitization is achieved by either the use of a heater that will provide a 82°C (180°F) final rinse temperature or through the use of a chemical sanitizer.

## WHY DOES AI IMPORTANT.

AI is important for its potential to change how we live, work and play. It has been effectively used in business to automate tasks done by humans, including customer service work, lead generation, fraud detection and quality control. In a number of areas, AI can perform tasks much better than humans. Particularly when it comes to repetitive, detail-oriented tasks, such as analyzing large numbers of legal documents to ensure relevant fields are filled in properly, AI tools often complete jobs quickly and with relatively few errors. Because of the massive data sets it can process, AI can also give enterprises insights into their operations they might not have been aware of. The rapidly expanding population of generative AI tools will be important to tasks ranging from education and marketing to product design.

## DISADVANTAGES OF AI.

The following are some disadvantages of AI

Expensive

Requires deep technical expertise

Limited supply of qualified workers to build AI tools

Reflects the biases of its training data, at scale

Lack of ability to generalize from one task to another

Disrupts human jobs, increasing unemployment rates

## HOW DOES AI WORKS ?

As the hype around AI has accelerated, vendors have been scrambling to promote how their products and services use it. Often, what they refer to as AI is simply a component of the technology, such as machine learning. AI requires a foundation of specialized hardware and software for writing and training machine learning algorithms. No single programming language is synonymous with AI, but Python, R, Java, C++ and Julia have features popular with AI developers.

Mahandas Karamchand Gandhi, commonly known as Mahatma Gandhi, was a towering figure in the Indian Independence movement & an emblem of nonviolent resistance. Born in 1869 in Porbander India, Gandhi's life journey was marked by his unwavering commitment to justice, truth & human right. Gandhi's early years were spent studying law in England & later participating in South Africa, where he first encountered racial discrimination. This experience planted the seeds of his future activism.

Dear Diary,

A school picnic.

I am very excited tonight. I am going on a picnic tomorrow with my classmate, some of our teacher will also accompany us. We have been planning for this trip ever since our principal gave us permission a month ago.

We are going to Londni Park. My mother has made a dozen sandwiches & a cake for me. My friends will also be bringing some food, & we shall all share, eat & play, for me it's like a dream come true as I had been ~~be~~ longing to visit the park for a long.

I feel I just cannot go to sleep. I keep imagining all the fun that we are going to have tomorrow. I might fall asleep at picnic. So, good night!

Q) You are sneha. Today is your birthday. Your father has gifted you a laptop. You are very happy to own it as you wanted it for a long time. Before going to bed, you want to share joy with your diary.

Tuesday, 19 August 2023,  
Dear Diary,

My joy knows no bounds. It is my birthday & my father has gifted me a portable laptop as a gift. It is like a dream come true as I have always wanted one for a long time. Now I will be able to browse the necessary information that I could not find in a library. I can't thank my father enough for the gift that he has given. He has never deprived us of anything in our life.

Now I can communicate with people through email & even chat with my friends. I can play games during my free time. Although it is a small thing, it connects the entire world. I hope I am able to use this gift effectively. The internet has made us global so it has great relevance in today's world.

## 'Importance of time management

Good morning, Today I am here to discuss a very important life skill that leads to success and a balanced life, and that skill is time management. We all have 24 hours in a day, but how we utilize these hours defines our success.

Time management is the manipulation and control of time when we manage our time effectively, we can work smart, not just hard.

Time management can improve your life in a multitude of ways. It can enhance your decision making skills, increase opportunities for growth, and reduce stress.

It leads to more opportunities & less time wasted on unnecessary activities. It provides you with the time to play, to explore, & to rest.

— as Benjamin

Franklin rightly said, "Last time  
never found again." So, Let's  
our time, manage it wisely,  
make our lives more productive  
fulfilling. Thank you.

2) A friendly minivan

In some corner of my dresser sits a smiling minivan on a tiny tricycle - a gift I received on my birthday from a close friend. The minivan is a cute, yellow, small melodious bench with a gaggle. It has one eye. The eye is outlined in black with thick dark lashes flowing from the brows. Its broad grin disappears into the web. white ruffle around its neck. The minivan wears a fluffy, two-tone nylon costume. The left side of the outfit is light blue, and the right side is yellow. The two colors merge in a dark line that runs down the center of the sm of the tricycle rather to the center and expand to the black tyre so that the wheel somewhat resembles the inner half of a grapefruit. The minivan and unicycle together stand about a foot high. As a cherished gift from a good friend this colorful figure greet me with a smile every time I enter my room.

Describe any three technical objects using correct grammar.  
1] Computer

A computer is a general-purpose device that can be programmed to carry out a finite set of arithmetic or logical operations since a sequence of operations can be readily changed the computer can solve more than one kind of problem.

Conventionally, a computer consists of at least eg one processing element and some form of memory. The processing element comes out arithmetic and logic operations and a sequencing and control unit that can change the order of operations based on stored information. Peripheral devices allow information to be retrieved from an external source and the result of operations saved and retrieved.

Modern computers based on integrated circuits are millions to billions of times more capable than the early machine and occupy a fraction of the space. Simple computers are small enough to fit into mobile devices and mobile cars can be powered by small batteries.

2) Mobile phone is a device that can make and receive telephone call over a radio link whilst moving over a wide geographic area. It does so by a mobile phone operator allowing access to the public telephone network.

In addition to telephony, modern day phones also support a wide variety of other services such as text messaging, email, Internet access, short-range wireless communications, business application, gaming and photography. mobile phones that offer these and more general computing capabilities are referred to as smart phones.

From 1990 to 2011, world-wide phone subscriptions grew from 124 million to over 5.6 billion, penetrating about 70% of the global population and reaching the bottom of the economic pyramid.

3) Camera

A camera is a device that records images that can be stored directly transmitted to another location or both these images may be still photographs or moving images such as videos or movies. The term camera came from the ~~the~~ word camera obscura, an early mechanism for projecting images. The modern camera evolved from the camera obscura.

Cameras may work with the light of the visible spectrum or with other operations of the electromagnetic spectrum. A camera generally consists of an enclosed hollow with an opening at one end for light to enter and a recording or viewing surface for capturing the light at the other end. A majority of cameras have a lens positioned in front of the camera opening to gather the incoming light and focus all or part of the image on the recording surface. The diameter of the aperture is often controlled by a diaphragm mechanism, but some cameras have fixed-size apertures.

Dear Diary

Arianna's birthday

It's Arianna's birthday today. She has invited me to dinner at a Chinese restaurant she has also invited some other close friends. I am looking forward to meeting them and indulge in a bit of gossip. I have also thought about presenting Arianna with a wrist watch. Today, my happiness knows no bounds as I'll meet some of my old friends. I still need to decide what to wear for the occasions.

Dear Diary,

My joy knows no bound today. It is my birthday and my father has given me a portable laptop as a gift. It is like a dream come true as I wanted to possess one for a long time. Now I would be able to browse the necessary information that I could not find in the library. I can't thank my father for the gift that he has given. He has never deprived us of anything in life.

Now, I can communicate with people through email and even chat with my friends. I can play games during leisure time.

Good evening one and all present here

Today is a very sad day for us in the office as we have to say good to our wonderful coworker. She has worked with us for a long time and has never let us down. She has always been extremely professional, hard-working and a team player. She has a brilliant mind and always brought creative ideas to the team.

She has not only been a fantastic colleague, she has also been a true friend. She always took the time to help her fellow colleagues who were always in a bit of a problem and has been a great source of joy in the office. She was always full of energy and cheerful to see even on Monday mornings.

She is a great loss to our co

but we were lucky to have the opportunity to work with her. We all wish you the best in the future.

## \* WASHING MACHINE \*

A washing machine is a machine to wash laundry such as clothing and sheets. The term is mostly applied only to machines that use water as opposed to dry cleaning which uses alternative cleaning fluids and is performed by specialist businesses. Ultrasonic cleaning washing entails immersing dipping, rubbing or scrubbing in water, usually accompanied by detergent or bleach. The simplest machines may simply agitate clothes in water while more sophisticated automatic machines may fill, empty, wash, spin and heat in a cycle.

### Pollution.

→ Good morning everyone. Today I am here to speak on the topic pollution. Pollution is a term that every one is well aware of it. It is one of the greatest challenges affecting the environment and human lives.

We can define pollution as the introduction of harmful substance into the natural environment that causes an adverse change in the land, water, air, soil, etc.

We cannot ignore the fact that we humans are responsible for the continuous rise in pollution. There is a famous quote that says man is the only animal that famous its own nest. Pollution has many types but four main types are affecting human animals and the environment in various ways: air, water, soil, noise, pollution, etc. At last, I would like to say that if we have to reduce pollution, like to say that if we have to plant more and more

press and make people aware  
of pollution only then we  
can protect the environment for  
the present as well as future  
generations. It is in our hands  
to be the change that we want  
in this world. Thank you.
