**Water Management Challenges**  
 The water management sector is facing significant challenges, including climate change, population growth, and urbanization. These factors are increasing the demand for water while reducing the availability of fresh water. The government needs to invest in infrastructure to improve water supply and quality.

**Health Management Challenges**  
 The health management sector is facing significant challenges, including the spread of infectious diseases, the aging population, and the rise of chronic diseases. The government needs to invest in the health system to improve the quality of care and reduce health inequalities.
